14 July 1964

MEMORANDUM FOR: Engineering Section/CB/PD/OL

SUBJECT : Contract

[Redacted]

25X1A

REFERENCE : Enclosure 1, Memorandum to NPIC from Engineering Section/CB/PD/OL, same subject, dated 6 May 1964.

1. The nonexpendable government property, listed in the referenced memorandum, was inventoried by the undersigned on 1 July 1964 at the Contractor's facility.

2. In making the inventory it was found that some line items were listed in several places on Schedule 1 with variations in the description of the item. Enclosure 2 lists the purchase orders in numerical sequence and the descriptions have been changed to fit what was actually on hand.

		Lens, enlarging, <span style="border: 1px solid black; display: inline-block; width: 80px; height: 20px; vertical-align: middle;"></span> f6.8, 300mm	A	2 ?	2 used in bread-board <span style="border: 1px solid black; display: inline-block; width: 150px; height: 40px; vertical-align: middle;"></span>
25X1A					

NOTE: \*"CD" is used as an abbreviation for the Change Detector, the end product under this contract.

\*\*In applying Category "A" it is assumed that the spares, the old film drive units and the "breadboards" will be shipped to us with the Change Detector.

25X1A \*\*\*According to  these items were "sold" to another contract. We should be given credit for this. The "sale" was apparently made after the 27 April 1964 date of the Audit Report.
